

Fullex Testing Services is accredited by the United Kingdom Accreditation Service (UKAS) with over 12 years of testing experience.

We offer PAS 23/PAS24 testing for residential doors and BS7950 for windows. The PAS23 tests establish that the product is fit for purpose, whilst PAS24 and BS7950 provide a method for assessing the security against unauthorized forced entry from an opportunist burglar.

Fullex testing services offer indicative testing for development purposes in addition to full testing. All tests are carried out by our highly experienced team of test engineers.

Fullex Testing Services work closely with Secured by Design and our test results are accepted by BSI, BRE, BBA and Q-Mark for inclusion within their third party certification schemes.

Local authorities and housing associations frequently specify to these standards and the tests listed are the basis for Secured by Design accreditation for window and door manufacturers.
