

Gemini double door system

Gemini makes composite or timber double doors simple. With both master and slave lock mounted on hard wearing aluminium extrusions that mount on the door edge, fitting is simple.

The 3 deadbolt master lock interlocks with the slave, locking the 14mm wide top and bottom shootbolts in place achieving both PAS24 and Secured by Design security.

- PAS23/24 and Secured by Design
- Tapered top and bottom deadbolts offer high security and compression
- Double operating handle option or dummy external handle to slave
- Split spindle option for use on front door applications
- 304 stainless steel faceplate and slave lock for high corrosion resistance

With a range of hardwearing and attractively finished extrusions available for both 44mm and 56mm composite door widths and with a direct fit option for Timber doors, Fullex Gemini is adaptable and secure.

When matched with the Fullex Kitemarked ABC anti snap and bump cylinder system, Gemini is at the forefront of residential double door security.

Gemini can be supplied with a wide range of colour matched door handles to suit.
